Subject: TRAI initiative on Rating of Properties for Digital Connectivity Framework-reg.

आदरणीय महोदया/महोदय,

Kindly find enclosed a communication from the Telecom Regulatory Authority of India (TRAI) on the above-mentioned subject for appropriate action by the Higher Education Institutions.

For any clarification or assistance, TRAI may be contacted at digital-rating@traigov.in.

सादर,

Dear Sir,

1. With the increasing digitisation of governance, business and daily life, reliable indoor digital connectivity has become critical, particularly since over 70% of mobile internet data is consumed indoors. The rapid deployment of high-capacity communication networks, including 5G, underscores the need for well-integrated **Digital Connectivity Infrastructure (DCI)** within properties.

2. In this context, TRAI has launched the '**Rating of Properties for Digital Connectivity Regulations, 2024**', notified on 25 October 2024 (available at <https://www.traai.gov.in/dcra-portal/regulation>), which introduces a voluntary, performance-based **star rating** system for evaluating the digital connectivity readiness of properties. The framework covers diverse categories including residential and commercial complexes, government and public buildings, airports, railway stations and other high-footfall areas.

3. The framework is guided by the comprehensive Digital Connectivity Rating Manual (available at <https://www.traai.gov.in/dcra-portal/rating-manual>), which outlines technical parameters such as fibre readiness, indoor mobile signal strength, rooftop access and ducting provisions, mobile network availability and Wi-Fi enablement. Assessments are conducted by TRAI-registered **Digital Connectivity Rating Agencies (DCRAs)**, with **Property Managers (PMs)** coordinating the evaluation process and ensuring that properties maintain the required digital infrastructure standards.

4. Given the critical role of universities and higher education institutions in enabling digital learning, research, and innovation, TRAI considers it important that academic campuses progressively adopt and showcase robust digital connectivity infrastructure. A structured Digital Connectivity Rating for university and college campuses would help: -

(a) Benchmark digital infrastructure across institutions in an

objective, comparable manner.

- (b) Encourage investments in future-ready connectivity supporting online education, research collaboration and emerging technologies.
 - (c) Provide students, faculty, and other stakeholders with greater transparency regarding the quality of digital access available on campus.
5. In this context, University Grants Commission (UGC) may consider : -
- (a) encouraging universities and colleges to obtain a Digital Connectivity Rating for their campuses as part of broader quality enhancement and accreditation-linked initiatives.
 - (b) exploring the possibility of referencing the Digital Connectivity Rating framework and manual in relevant guidelines, advisories or best-practice documents issued to higher education institutions, particularly in the areas of infrastructure, digital learning, and campus development.
6. If so desired, UGC or universities and colleges may select any one of the empanelled DCRA's for the purpose of rating, the list and details of which are available on the TRAI DCRA portal (<https://www.trai.gov.in/dcra-portal/registered-dcra>).
7. Should any assistance be required, TRAI HQ would be pleased to assist and may be contacted at digital-rating@trai.gov.in.

Regards,

**DCRA Cell,
TRAI**
